

COMPREHENSIVE SERVICES FOR INDUSTRIAL PLANTS

PROJECTS CONTRACTING ASSEMBLY RENOVATIONS REPAIRS SERVICE

What can we do for you?

- › We will design and construct technological infrastructure for the operation of your plant.
- › We will take care of the conscious and economical management of maintenance costs.

30 years professional
realizations

termoinstal

**The company "TERMOINSTAL" Sp. z o.o.
has been operating on the market for almost 30 years.**

We are a production and assembly company recognized by clients and the market. For many years, we have been specializing in the design, manufacture, assembly and renovation of sanitary equipment and installations as well as technological installations along with the construction of heat and cold insulation.

Our qualified employees under the supervision of the managerial staff produce prefabricated elements and perform assembly services in compliance with the applicable technical and quality standards.

We provide services and products of the highest quality and reliability. Carrying out installation and assembly of equipment is done in accordance with applicable standards and regulations. At the same time, to meet the expectations of customers, we tailor projects according to their needs and objectives.

In May 2017, our company joined forces with B&P Engineering – a leader among manufacturers of complete production lines as well as machinery and equipment for the food industry and a producer of stainless-steel tanks. As a result of the merger, the B&P Engineering Group was established.

B&P Group

The B&P group is a leader in services related to the construction of complete production lines for the production of juices and concentrates.

Together with Termoinstal, B&P Engineering also provides subcontracting services to leading international companies in the chemical, pharmaceutical and food industries.

The production profiles of both companies are complementary with each other, which allows us to direct customers to comprehensive offers that include a wide range of shared capabilities.

PROJECTS

CONTRACTING

Why termoinstal ?

- ◆ We have a wealth of knowledge and experience in the field of industrial technological installations.
- ◆ We have professional engineering-technical and executive staff.
- ◆ We use only high-quality materials and components from reputable suppliers.
- ◆ We are flexible and offer the best technological solutions that will result in cost-effective operation of the installation in the future.

Our highest goal is customer satisfaction and their continued confidence in the quality of our products and services.

SERVICE

REPAIRS

RENOVATIONS

ASSEMBLY

Licenses and certificates

We work according to the standards of the Quality Management System
PN EN ISO 9001:2015

We meet the requirements of the EU Directive – **OTI-CERT**
for the production of pressure equipment.

We have licences from the Office of Technical Inspection in the scope of:

performing works according to **Module A2 Cat. II**.

performing works according to **Module G**.

UC-22-19-M/2-02 entitling us to repair steam and water boilers and permanent pressure vessels.

We work in accordance with the EU directive **2014/68/UE**, giving the **CE** mark to the products.

INDUSTRIAL PIPELINES

construction / assembly / renovation

- ♦ technological pipelines (water, steam, compressed air)
- ♦ sanitary pipelines
- ♦ sewage pipelines
- ♦ stainless steel technological pipelines for the food industry
- ♦ pipelines made of copper pipes
- ♦ medium and high-pressure gas pipelines together with assembly of reduction and measurement station

 **termoinstal**

COOLING INSTALLATIONS

construction / assembly / renovation

- ♦ pipelines for glycol and ammonia refrigeration systems
- ♦ assembly of refrigeration units and fittings
- ♦ renovation works of cold stores and freezers down to -40° C

VENTILATION AND AIR-CONDITIONING INSTALLATIONS

construction / assembly / renovation

- ♦ delivery and assembly of air-conditioning units
- ♦ delivery and assembly of ventilation, air conditioning and dedusting installations
- ♦ regeneration, measurement and commissioning of installations

 termoinstal

REPAIR OF EQUIPMENT SUPERVISED BY OTI

construction / assembly / repair / renovation

- ♦ water boilers
- ♦ steam boilers
- ♦ pressure vessels

INSULATION

construction / assembly / renovation

- ◆ cold insulation with polyurethane foam and lagging
- ◆ heat-insulating insulation with mineral wool, mats and lagging

 **termoinstal**

SHEET METAL WORK

construction / assembly / renovation

- ◆ insulation coats for pipelines and vessels
- ◆ insulating hoods for fittings and equipment
- ◆ insulation coats made of galvanized steel, aluminium and chromium nickel in flat and trapezoidal versions

BLACK STEEL AND CHROMIUM WELDING WORKS

- ♦ electric welding
- ♦ gas welding
- ♦ shielded welding CO₂ MIG - MAG
- ♦ argon - TIG welding
- ♦ welding subject to O.T.I.

 termoinstal

STEEL CONSTRUCTIONS

construction / assembly / renovation

- ♦ black steel constructions painted or galvanically protected
- ♦ stainless steel constructions

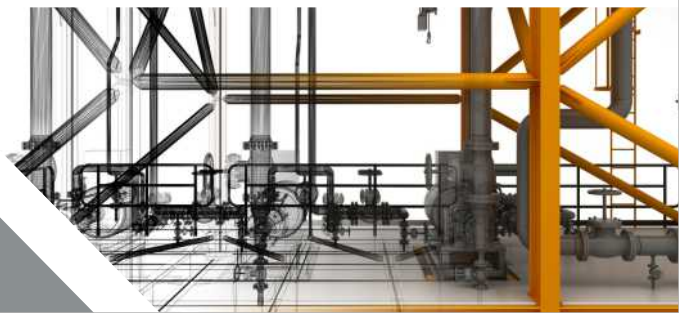

**OTHER SPECIALIST WORKS**
construction **assembly** **renovation**

- ◆ installation of a water treatment station
- ◆ installation of steam measuring devices
- ◆ installation of economizers (heat recovery)
- ◆ installation of autoclaves
- ◆ assembly of exchangers
- ◆ delivery and installation of flue gas ducts, chimneys
- ◆ renovation works of technological lines in the food, chemical and glass industries
- ◆ renovation works of thermal installations
- ◆ renovation works of technological installations (water, compressed air, acetylene, gas, pneumatic transport) for the glass industry

 **termoinstal**

- ◆ renovation works of technological installations (water, glycol, ammonia, hot gases, compressed air) for the meat industry
- ◆ renovation works of technological installations for the chemical industry
- ◆ comprehensive construction of water and steam boiler houses for solid, liquid and gas fuels
- ◆ construction of technological installations for sewage treatment plants

COMPREHENSIVE INDUSTRIAL PLANT MAINTENANCE

- ◆ maintenance service for machinery and production lines
- ◆ periodic inspections and maintenance
- ◆ renovation and modernization
- ◆ ongoing repairs

Thanks to the professional service of machines and devices, we ensure continuity of production. We work with companies with a global reputation.

What will cooperation with us be like?

- ◆ The maintenance service we provide is tailored to the company's capabilities and needs. Based on interviews with the client, we define the exact specifications and scope of services (we divide the machines into strategic, key and other). After estimating the costs, we talk with the client to determine the suitable model of cooperation. The cooperation model may be different depending on the importance of the machine in the process: reaction or constant.
- ◆ We analyse all events in detail. We take corrective and optimizing actions to eliminate the risk of future failure. The result of this is the constant improvement of the planned schedule and periodic maintenance and inspection of equipment, as well as a low failure rate of machines serviced.

STAGES OF COOPERATION

1

determining the scope of services

2

audit and analysis of the actual situation of the customer

3

preparation of the implementation plan

4

presentation of the offer

5

signing the contract

Strong technical and engineering facilities

Perfectly equipped workshop and repair facilities as well as support from engineers allow us to react quickly to customer needs.

Modern machinery park

As the B&P Engineering Group, we have 25.000 m² of production space together with a mechanical department equipped with the most modern CNC machining centres.

Experienced engineers

Constant optimization and improvement of the service provision process is guaranteed by experienced engineers from the R&D, optimization and construction departments.
